- weak back
- stomach ulcers
- pain relief
- paralysis
- MS symptoms
- fractures
- soft tissue
- tendons
- ligaments
- cartilage
- bones
- skin problems
- first aid for cuts

#### TESTIMONIAL:

I heard about your product from a girl named Tiffany. Tiffany is my dog's trainer. She suffers from Irritable Bowel Syndrome and in a conversation I told her that my German Shepherd mix had the same thing and he was on Prednisone. She had also been on Prednisone for two years and I too was looking for an alternative. Tiffany gave me your website and told me how taking ounces a day had cleared up all her digestive problems and had gotten a boost of energy on top of that. It took me about 2 months to actually buy it. I called in and spoke to you Sharone and we discussed how much Prednisone Bear was on and you gave me instructions on how to faze him into just taking RR. I will admit I was very skeptical because his vet and I had already done different things and nothing seemed to work for him other than Prednisone. Several things concerned me about Prednisone like the toll the meds were taking on his kidneys but his lack of energy and lack of interest to play with Shelby my lab was really hard for me. He also exhibited slight signs of aggression. Only three days after starting him on RR I saw a change in his energy level. By the third week and completely off the Prednisone, his energy level went through the roof. He now plays all the time, goes jogging with Shelby and I and

his aggression towards Shelby cleared up. I was so impressed that I now give it to Shelby also. I recently shared RR with pulp with a friend who has two heel spurs and her pain considerably diminished. She asked me to order a bottle for her. Thanks you for creating such an amazing product.

– S. Martinez

I just wanted to write to you to let you know how Buster is doing. As per your suggestion I started him on Rapid Response to help his bad back. I stopped the med. he was taking because it wasn't doing anything and he was like a zombie from the meds. After 2 days of the Rapid Response I could tell he was feeling a lot better and able to play with our other 1 year old dog somewhat. It has now been approx. 2 weeks and he has much more energy and can play tug of war with the other pup for quite a while each day. Thanks you so much. Your product is great and I am thankful that I don't have to give him any more medicine.

– K.W.
